Umbilical Tags

Smallest and Lightest available, with choice of single-use, 3 or 12 months life

Pediatric Patient Tags

Cut-band Tamper Detection without exposed metal parts for greater reliability

Protecting your vulnerable Patients:

TotGuard™ ensures a safe and secure environment for your newborns, saving time you can use to focus on quality of care

GuardRFID's TotGuard™ Infant Security solution is the most significant tool to add to your standard security procedures and resources for protecting your newborn patients. Using the most robust technology available, TotGuard™ actively monitors and instantly notifies you of any alerts and alarms triggered by the TotGuard™ tags.

Advantages

- Fully supervised, secure and reliable system.
- Advanced user interface that is easy to learn and simple to use.
- Smallest tags in the world – easy to apply and comfortable.
- Patented dual tamper sensing tags minimize nuisance alarms.
- Mother/Baby Bonding protects infants from potential mismatch.
- Video Surveillance integration provides live view of event site.

TotGuard™ tags are the smallest available in the market, making them safe, comfortable and easy to apply to the tiniest of infants. TotGuard™ is the only system that offers three types of tags for infants which include unique dual-sensor tamper detecting tags, cut-band based tamper detecting tags, and umbilical tags. With TotGuard™ you can even add GuardRFID's Article Tags for tracking, locating and protecting your equipment, Staff Tags with Duress and Man Down capability to provide safety and security for your personnel, and Mother Tags to ensure an infant is in the care of the right mother.

TotGuard™ is 100% IP-based and in full compliance with today's corporate IT policies, so implementation in one facility or throughout your enterprise is easy and highly-scalable. It is the only Enterprise class Infant Security platform in the market, allowing several disparate locations to be monitored from a central location.
