Argus AllGuard™ Integration with Lenel OnGuard™

FEATURES:

- **Seamless integration between AllGuard™ Active RFID Platform and OnGuard™ Integrated Security Management Platform**

- **Triggering of native OnGuard events with Argus AllGuard RFID / RTLS events.**

- **Argus AllGuard event annunciation and acknowledgement within OnGuard™ application with alarm auto-acknowledgement in Argus AllGuard**

- **Automatic synchronization of OnGuard Cardholders with Argus Users**

DESCRIPTION:

GuardRFID's Argus AllGuard integrates with the Lenel OnGuard™ Integrated Security Management platform using Lenel's DataConduIT interface. This integration enables the two systems to work seamlessly with each other, with the Argus AllGuard platform providing the Active RFID Tag network and event management capabilities and OnGuard™ providing Access Control functionality.

Argus AllGuard events can be viewed and acknowledged in OnGuard with automatic feedback returned to Argus AllGuard. Native OnGuard events can be triggered by Argus AllGuard events. OnGuard cardholders can be automatically synced with Argus system Users and Tag Holders.

The integration allows OnGuard users to take advantage of all the features of the active RFID / RTLS system, including people and asset perimeter protection as well as real time tracking and location in market segments previously not available to OnGuard.

Some of the Argus AllGuard events presentable in OnGuard™ are as follows:

Argus AllGuard Event	Description
Tag Exit	Tag detected at the portal
Tag Presence	Tag present in certain area on the floor plan
Tag at Checkpoint	Tag detected at certain pinpoint location
Home Area Mismatch	Tag detected in any other area except their Home Area
Tag Tamper	Tag removed from patient or asset without authorization
Tag Loiter	Tag detected at the portal for prolonged period of time
Node Offline	Infrastructure device communication problem
Duress	Staff member call for help
Man Down	Man Down alarm declared by a Staff Tag worn by a staff member

INTEGRATION SYSTEM REQUIREMENTS:

OnGuard™ versions supported	OnGuard 6.3 OnGuard 6.4 OnGuard 6.5 OnGuard 6.6 OnGuard 7.0 OnGuard 7.1 OnGuard 7.2 OnGuard 7.3
